CONTRACT GROWING

If you have any special plants for propagating, we may be in a position to do it for you. Plants for grafting should be arranged for at least one year in advance to give us the opportunity to obtain the understocks. Plants for softwood cuttings should be arranged for prior to July and for hardwood cuttings prior to October.

We will be glad to have your inquiries.

TO THE TRADE

September 1952

Dear friends,

Continued good business for the nursery industry is the report from Detroit, scene of the recent annual A. A. N. convention. Are you prepared with a well stocked nursery? An empty one seldom makes any money.

We are listing an especially good selection of ornamentals this fall and would sure be pleased to have your order. Our stock is especially good too -- backed by 31 years of growing experience.

This is a good time to plant. Fall planted stock always has the jump on spring plantings and is well established before the hot dry summer. And it leaves you more of that valuable spring time for sales.

May we serve you. It would be our pleasure and your gain, we assure you.

Yours sincerely,

JOHN VERMEULEN & SON, Inc.
